

Description

This image recording module is a standard module which using 4 bit data for various command control the module.

Features

- ü Small in size: 80x55mm
- ü 1-channel AV input
- ü Motion detect or manual capture
- ü External trigger to capture a photo/AVI
- ü JPG – 720x480 (D1)
- ü AVI with audio recording– 720x480 30fps
- ü MJPEG, QVGA selectable
- ü Support SDHC to 16G
- ü Alarm output when motion detected
- ü Video output to TV
- ü DC12V operation
- ü 4-bit Keys operation
- ü Preset NTSC or PAL TV system input
- ü Battery backup to prevent file corruption
- ü Watch dog timer to prevent from system hang
- ü MCU for customer protection
- ü RTC to display date time
- ü Stamp data time on photo/AVI
- ü 2mm pin connectors

Connector Description

Connector	Function	Remark
J1	Select NTSC/PAL	Need to be selected before power up
J2	Select AVI/JPG	Need to be selected before power up
J3	NC	For debug purpose
J4	SD card	SDHC support upto 16G
J5	Trigger input	Active Low
J6	Alarm Out	Active low when motion detected
J7	NC	For debug purpose,
J8	Camera input	4-pins, for audio video signal in and power supply (option)
J9	Keyboard input	4 bit binary input with common ground, internal pull high
J10	A/V out	3-pins, To output audio video signal to TV set
J11	Power	Power input

Electrical Characteristics (at room temperature 25C)

Parameter	Condition	Min	Type	Max	Unit
Operation Voltage		7.5	12	13.5	V
Operation Current					mA
Standby Current	No Video o/p				mA

Key Definition

Key	Name	Key	Name
0001	Snap Shot	0111	Menu
0010	OK	1000	NOP
0011	Down	1001	Left
0100	NOP	1010	UP
0101	Right	1011	Mode
0110	Disp	1100	NOP

Note: all other combinations are NOP (no operation)

Operation

Users can make his own keyboard according to the key definition stated and perform the following operation.

Preview Mode

- 1 Change mode between view and play back. By default, the DVR is in view mode when power up. One can press MODE to switch view or playback
